Urgent Care or Freestanding Emergency Room? How to Know the Difference

Distinguishing between an urgent care facility and a freestanding emergency room can be tricky. It's important to know where you are being treated, because freestanding emergency room treatment can cost thousands more than the same treatment at an urgent care clinic.

Look for the following clues to distinguish the difference. Freestanding emergency rooms:

- Include the word "emergency" in the facility name
- Are never attached to a hospital
- Are usually located in more affluent neighborhoods
- Offer more complex treatment options than urgent care
- Do not accept Medicare and Medicaid patients
- Charge much higher prices than urgent care facilities
